

ENVIRONMENTAL POLICY

The basis of our Environmental Policy is to be protective and supportive towards the environment we live in and the society we live in, and to leave a livable future for us and the generations that will come after us. In order to be an environmentally friendly hotel, we know the effects of our activities on the environment and we work to minimize these effects.

For this;

- We comply with legal regulations related to environmental legislation and demonstrate a highly environmentally responsible approach.
- While maintaining our service quality in line with the expectations of our guests, we also pay attention to the responsible use of energy, water and materials in order to protect natural resources.

We implement reuse and recycling activities and monitor our performance in areas such as energy consumption, water consumption and waste material management.

- We try to reduce both the negative impact on the environment and the amount of waste by ensuring that hazardous substances and chemicals are used only when necessary and as needed.
- We aim to increase the sensitivity of our employees by training them on environment and waste management.
- We provide guidance and establish collaborations to ensure that environmental awareness is adopted not only by our employees but also by our guests and suppliers.
- We support the sustainability of tourism in the region by presenting our local cultures to our guests and directing them to historical and cultural activities in the region.
